

Mr. Farmer:

Are you looking for a low priced Fertilizer this year? If so, why don't you try **Page's Fertilizing Salt**

We are offering the same grade of Salt that we have sold for so many years at the very low price of

\$4.00 PER TON, F.O.B. HYDE PARK

We do not ask you to take our word as to its valuable qualities, but give below extracts from a few letters just received from some of our last year's customers:

Ex-Gov. Josiah Grout of Derby purchased a fifteen-ton carload. Read what he says.

"I used the Fertilizing Salt last season on oats and think I realized a paying return. The ground was of a light, quick soil, and of medium quality. I applied, as the oats were coming up, about 400 lbs. to the acre. I used it on about 20 acres and harvested over 1,000 bushels of good oats. Used no other Fertilizer. The grass seed catch was fine."

JOSIAH GROUT, DERBY, VT.

GOOD FERTILIZER AND CHEAP.

The Fertilizing Salt I bought of you last year was very satisfactory to me. I experimented on several crops. On grassland it will double the crop. It will make pastures good for all summer if salt is put on as soon as snow is off. On Oats, it does very well. Also improved Mangels and Turnips. I am still experimenting on it, but can recommend it as a good Fertilizer and the cheapest I ever bought.

JOHN BECK, St. Johnsbury, Vt.

EXCELLENT FOR ASPARAGUS AND POTATOES

I used your Fertilizing Salt with good results on my Asparagus. I also used it on manure piles that I bought and piled and think that it stopped the loss caused by heating. The balance I used with the most strawy part of the piles put onto the load after it was loaded onto the spreader and used in on the lightest soil (on old ground) where I planted potatoes. Of course, the ground was well fertilized in addition to the salt with a suitable amount of manure for humus and potato fertilizers and thoroughly cultivated throughout the season. The tubers were smooth and of good quality.

J. E. SMITH, White River Jct., Vt.

We will gladly send you full information as to freight rates to any station. The rates on carloads, especially to points on the St. J. & L. C. R. R. and Passumpsic division of the B. & M. are very low. We will tell you exactly what they are if you are interested.

Do You Expect to Use Any Commercial Fertilizer This Year? If so, get our prices for home-mixed goods before making your contracts for the season.

CARROLL S. PAGE, Hyde Park, Vt.

EAST BURKE

Much Sickness the Rule—Comings and Goings of the Village

J. D. Lawton has been confined to the house the past week with the grip.

Some Facts on Oxy-Gas Welding

WELDING is not confined to wrought iron and steel as in the old days. We weld cast iron, aluminum, bronze, and steel castings, whether for large or small machines or wheels.

METHOD used is to weld broken ends or cracks and run in fresh metal, specially refined for this purpose. Heat being generated by our apparatus focussed down to a small point, making a perfect weld.

DURABILITY of our work has been amply tested. Welds give 70% of original strength. Where some extra thickness can be given it is easy to make weld stronger than rest of casting.
